

LITTLE ENERGY
IN STOCK MARKET

Profit Taking Offsets Stimulus Derived from Rise on Foreign Markets.

NOTE—All market news on this page reflects closing sale prices unless otherwise specified. Wednesday, May 14.

New York, May 14.—None of the energy displayed in the market up of prices in the financial trading yesterday was visible in speculation during the morning. Profit taking offset the slight stimulus derived from the rise in foreign markets, but realizing sales were not pressed and prices rallied easily when offerings were withdrawn.

Bull traders were inclined to buy on recessions, having their position on the market's calm reception of New York Central's financing plan and the steps taken at Washington in the movement for higher freight rates. There was no sustained inquiry, however, and movements were so small that the market could hardly be said to have developed a definite tone. Lack of outside orders was apparent in the narrowness of speculation, no transactions occurring during the morning than several which recently had been active.

Bonds were steady.

Some low priced stocks seemed to be affected by the decline in the Wabash to new low records. The common sold at 2 1/2 and the preferred 3 1/2. Missouri Pacific reacted a point, and the southern and southwestern shares were less firmly held. Speculation was at a standstill in other quarters.

All stocks had a manifestly easier tone in the last half of the session. Absence of demand and scattering liquidation of minor shares contributed to the market's depression.

The market week. Speculative shares were offered more freely and the list surrendered practically all that it gained. Liquidation of Pennsylvania, the Wabash and discouraging steel trade reviews influenced bear selling.

INITIATIVE AND REFERENDUM

As only one constitutional amendment resolution can be made at one time, the friends of the tax amendment desired that it be given precedence over the initiative and referendum.

At least such is the opinion of freight shippers in El Paso. They believe that the unloading charges will be absorbed by the railroads and will not add material to the freight rates.

Heavy Police Guard Is Furnished for Operation of Street Cars—Violence Not Attempted by Strikers.
Cincinnati, O., May 14.—With only three cars operating and these escorted by a heavy police guard over their entire route, the strike of the Cincinnati Traction company today gave every evidence of settling into a long siege. No efforts were made by the strikers or their sympathizers this morning to interfere with the operation of the three cars that left the barn at 3 o'clock, hemmed in on all sides by mounted policemen and preceded and followed by police automobiles filled with officers. The cars operated slowly and carried no passengers.

Paterson, N. J., May 14.—An attempt to enter a magazine building where 20,000 sticks of dynamite are stored was made by persons unknown to the authorities. Entrance to the building was forced by picks, but concrete walls barred the way to the explosive. The police have found no evidence connecting the attempted train wrecking and the attempt to steal the dynamite with the strike situation in northern New Jersey. Thousands of silk mill operatives

and railroad and contract laborers are out in four counties. The silk strikers are organized with the Industrial Workers of the World, and the railroad and contract workers with the Laborers' International union.

Railroad property is being guarded and the detectives assigned to locomotives are under orders to keep a careful lookout for obstructions. Several gangs of men found loitering near railroad bridges were dispersed.
